RE: Equipment Order Process

- Customer information – Company, individual, division they work for, email, phone number and PO if applicable.
- Discuss rental – Rate, term and start date.
- Equipment needs – prefer a week lead time to guarantee the delivery is made within the 24 hour time frame for the equipment that is needed for the project. We will discuss the project and work together to make sure the equipment is right for the job.
- Delivery – If we are delivering the equipment, we will need the exact address of the location, on-site contact information – including name and phone number.
- Return – Customer can call to let us know the project is done and equipment needs to be returned. We will need the name and number of the person calling off the rental.
- Ending Rental – Once machine is returned it is reviewed for hours, fuel and damages. There may be final charges to cover anything that needs to be fixed, replaced or over-hours for rent.
